

Firoz Ahmed

Mail: ahmedfiroz.k@gmail.com Mobile :+91 9513413602

Roles

- Teradata Operations DBA
- Teradata Application DBA

Technologies

- Teradata
- Oracle
- Data Stream Architecture
- Unix
- Veritas NetBackup
- Net vault
- Query Grid
- Data Mover
- BCM

Industries

- Mobile
- Pharma
- Retail
- Insurance

Education

- M. Tech Computer Science

Certifications

- Teradata Vantage Certified Associate
- Teradata Vantage Lake Certified Associate
- Vantage Administration Certified

Summary

Over all 10 years of IT experience as software engineer which includes 8.2 years of experience in Data warehousing projects as Teradata DBA. Good exposure in Teradata tools like Teradata Administrator, SQL Assistant, Viewpoint, Teradata Studio, Data Labs, DSA, NOS and TSET. Strong Experience in Teradata administration (creating tables, granting permissions, managing workloads, monitoring the system for performance) on a large Teradata database. Involved in Performance Tuning of Queries of users facing spool and long running queries. Having good experience in UNIX. Teradata database Backup, Archive and Restore using ARC Main, Net vault, Veritas NetBackup, DSA, Query Grid. Error handling and troubleshooting of Teradata utilities (load and unload) for e.g. FastLoad, MultiLoad, FastExport, T pump, Arc/Restore. Worked on Data Refresh activities from Production Environment to DEV, TEST Environments. Code review and migrations to production. Active participation in Teradata upgrade/Patch activities and following up of TAYS tickets. Having knowledge/Trained on GCP Data Engineering and Python.

Teradata Consulting Engagements

T-Mobile

Teradata Operations DBA | 12/2021 – 12/2024

I possess comprehensive expertise in database administration, adeptly managing crucial facets such as user and space management, profile creation, and access provisioning tailored to specific requirements. My proficiency extends to database optimization tasks, including the identification and elimination of redundant objects, meticulous space management, and vigilant monitoring of database expansion. My commitment to data integrity and availability is reflected in my vigilant oversight of backup jobs, promptly addressing any potential failures to uphold uninterrupted operations. Throughout this project, I gained practical experience with Query Grid and actively participated in housekeeping activities such as cleaning up unused tables and backup tables, as well as managing roles. I diligently monitored Viewpoint alerts and promptly addressed any issues that arose. Additionally, I closely monitored daily critical job calls, ensuring adherence to SLAs.

Technologies Deployed: Teradata 16.20.xx, Teradata Vantage Could 17.20.xx, Viewpoint 16.50, DSA 17, Query Grid 2.19, Unix Shell Scripting, Data labs, NetBackup Console 8.2, WinSCP

Professional Work History

Wipro Technologies

Senior Teradata Database Administrator | 06/2021 – 11/2021

I was serving on bench, As there was no project allocated in this tenure.

HCL Technologies

Senior Database Administrator | 06/2018 – 06/2021

I worked as an Operations Teradata DBA, where I played a key role in ensuring database stability, high availability, and cost efficiency for the client's large-scale data warehouse environment. I implemented proactive monitoring and maintenance strategies that improved overall system reliability and responsiveness. By identifying inefficient workloads and optimizing them through partitioning, indexing strategies, workload management (TASM), and capacity planning, we significantly reduced resource consumption, resulting in substantial savings on CPU utilization and storage costs. Additionally, I streamlined operational processes, automated routine health checks, and optimized backup and restore cycles, which minimized downtime and improved SLA adherence, leading to measurable gains in infrastructure efficiency and operational effectiveness.

Brillio

Teradata Database Administrator | 06/2017 – 06/2018

Production support with 24*7. Handle JIRA tickets, Incidents, Work Orders, Change Requests (CRQs) etc. Work on User related issues, Access related issues, DB issues, Space issues etc. Handle Page requests for Job abandons/issues and work with Application team/concerned team to fix the issues. Creation of Database objects, Roles, Profiles. Prepare implementation plan and participate in code reviews with Walmart DBAs for create/alter table, application id creation, Sandbox creation, secure access etc.

Fujitsu Consulting India Pvt. Ltd.

Teradata Database Administrator | 03/2015 – 06/2017

Experience using Teradata Administrator to Monitor and Manage Teradata Database. Creating Teradata objects like Databases, Users, Profiles, Roles, Tables, etc. Granting & Revoking of Object Rights, System Rights on Databases / Users / Roles. Preparation of backup and restoration scripts and monitoring. Implemented MVC on the tables which is consuming more space and I/O. Working as ticketing POC and preparing change tickets for schedule implementations.

Meghana Consultancy Services

Software Engineer | 01/2014 – 12/2014

I have responsibilities spanning the verification of Oracle Database instance and Listener status, ascertaining their operational status. Additionally, I handle the granting and revocation of Object and System Rights concerning Databases, Users, and Roles. Furthermore, I am tasked with Storage and Capacity planning, ensuring ample space availability for seamless database operations.
