DOMAIN KNOWLEDGE	Banking, Insurance and Airline

PROJECTS:**Teradata India Private Ltd****Role: Teradata DBA**

Working for Bank of Ireland Group plc. It is a commercial bank operation in Ireland and one of the traditional Big Four Irish banks. Historically the premier banking organization in Ireland, the bank occupies a unique position in Irish banking history. At the core of the modern-day group is the old Governor and Company of the Bank of Ireland. Bank of Ireland is not, and was never, the Irish central bank. However, as well as being a commercial bank, a deposit-taker and a credit institution. it performed many central bank functions, much like the earlier-established Bank of Scotland and Bank of England. Bank of Ireland operated the Exchequer Account and during the nineteenth century acted as something of a banker of last resort. Even the titles of the chairman of the board of directors (the Governor) and the title of the board itself (the Court of Directors) suggest a central bank status Bank of Ireland is headquartered in Dublin, and has operations in the Republic of Ireland, Northern Ireland, Great Britain and elsewhere. We as a DBA support in 24/7 shifts from multiple locations

Role & Responsibilities:

- Creating Users and granting roles and profiles based on the request from the users
- Monitoring the viewpoint continuously and sending mail to the users if we find any suspected queries and advice on the recommendations based on the query
- Actively monitoring the backups and preparing backup sheet, resolving the issues if any failure occurs
- Creation of the tables, Views and inserting the data into tables as part of the Change deployment.
- Worked on data mover copying the data from a higher environment to a lower environment and checking if any DM failure occurs and resolving the issues.
- Worked on the Partition primary index extension for tables and implementation of the MVC for the hot data tables.
- Worked on the Internal Audit review, providing evidence as part of the Audit.
- Sending the weekly updates like space report and tasks which we have completed, sending dm missing objects on weekly basis.

- Involved in the monthly password change activity and creating new viewpoint users and assigning the required roles.
- Worked on performance tuning like spool issues and any performance degrade queries, Tuning the queries and suggesting the recommendations to the users based in the query
- Involved in the Change creation process, attending pre cab and post cab meetings as part of the change implementation.
- Creating new backup scripts, Scheduling backup jobs in the Crontab based on the backup schedule, monitoring daily backup jobs and preparing the backup sheet.
- Worked on the End-to-end upgrade activities like viewpoint upgrade and quantum firmware upgrade, Drive Replacement and worked on ad hoc issues like access issues and job failures, lock issues.
- Involved in the environment creation activity. Creating a new environment like creating databases, users and granting the required access to the users and storing passwords in the TD wallet.
- Involved in the deployment activities like deploying the objects in production and pre-production and refreshing/creating the views once the deployment is successful.
- Involved in check Table and Scandisk activity and version upgrades, Weekly report preparation like space report, Tasks completed in a week and presenting it to the customer.
- Preparation of the Data mover Failures Reports, Backup Reports and Row count validation for production and preproduction data.
- Worked on space automation for the databases which have been crossed threshold limit, alert creation in the viewpoint.

Legato Health Technologies
